

CLICK 5000

CLICK ONCE FOR EVEN MORE SERVICE.

With the Click 5000 photo system you have all the possibilities of professional image processing at your fingertips: printing, copying or retouching digital photos, and a great deal more – it's fast, simple and efficient. Multiple powerful features, including a 17" TFT touch screen, make the Click 5000 a real pleasure to work with. With the optional Mitsubishi printers, the same degree of versatility applies to print size: the CP9550DW-S offers 6 formats up to 15 x 23 cm, while the CP3020DE even prints up to 20 x 30 cm.

The Click 5000 opens up new sources of income. Extend your offers with a passport photo service: the system's software converts digital portraits into passport photos. The Click 5000 even earns its keep in the field, making a profit from event photography. Using the Slide Show software, you can link up a second screen and process photos while presenting them to

customers at the same time. Whichever way you go, the Click 5000, with its low purchase price and individual upgradeability, will soon pay its way.

HIGHLIGHTS

- Intuitive user interface
- Image data input via USB, Bluetooth™ and all common storage media
- Connectable to Mitsubishi printers CP9550DW-S, CP3020DE
- Compilation of photo CDs or DVDs using integrated burner
